Nohsonic Physiotherapy Clinic

Prepared By

Chov

1st June, 2026

1. Overview

Nohsonic Physiotherapy Clinic is a new physiotherapy practice preparing to open. This project, delivered by **Chov**, covers a set of **brand assets** (logo, letterhead, colour and type system) and a complete, fully featured **clinic website** built and launched as a finished product.

The clinic is **physiotherapy only**, so the site should feel focused and specialist rather than a general hospital site. The aim is a professional, trustworthy, and warm online presence that makes getting in touch and booking effortless from day one.

2. Objectives

- Launch a polished, credible website that represents the clinic well from the start.
- Make it easy for patients to find the clinic, understand its services, and get in touch.
- Generate calls, WhatsApp messages, and appointment requests.
- Establish a clean, consistent brand across web and print.

3. Target Audience

- Patients seeking physiotherapy: sports injuries, post-surgery rehab, chronic back/neck pain, sciatica, stroke and neuro rehab, post-natal, geriatric care, and more.
- Family members researching care on a patient's behalf.
- Referring doctors and other health practitioners.
- The local community around the clinic.

4. Scope

A single, complete clinic website, built and launched in full — not a phased or “coming soon” release.

Out of scope (for now)

To keep the build focused, the following are **not** included in this version, but can be added later:

- Online payment / e-commerce.
- Patient login portal or medical records.
- Live appointment-calendar scheduling (this version uses a simple request form).
- Blog / articles (optional later addition).

5. Brand Deliverables

Deliverable	Notes
Logo	Primary logo plus a simplified/icon version, light and dark variants, and a favicon for the website.
Colour palette	Calming, health-oriented (e.g. blues/greens with a warm accent), defined as exact hex codes.
Typography	One or two web-friendly fonts for headings and body text.
Letterhead	Branded A4 letterhead template (Word/PDF) for official correspondence.
Mini brand guide	One page covering logo usage, colours, and fonts to keep everything consistent.

6. Website Requirements

6.1 Pages

Page	Purpose
Home	Overview, key services, clinic video, and a clear call-to-action to call or book.
About	The clinic's story, philosophy, and facilities.
Services / Conditions Treated	Each service explained simply — the core of the site.
Our Team	Physiotherapist bio(s), photos, and credentials — essential for trust.
Book an Appointment	Simple request form (name, phone, preferred time, reason) routed to email/WhatsApp.
Contact & Location	Phone, WhatsApp, email, address, map, and opening hours.
FAQ	Common questions: what to bring, session length, HMO/insurance, pricing approach.
Testimonials	Patient reviews once the clinic is running.

6.2 Key Features

- Mobile-responsive (most visitors will be on phones).
- Fast loading and secure (HTTPS / SSL).
- Click-to-call on the dedicated phone line.
- WhatsApp chat button (*to confirm*).
- Contact / booking form delivered to the clinic's email and/or WhatsApp.
- Embedded clinic video.
- Google Maps embed for directions.
- Basic SEO and a local business listing so the clinic appears in local searches.
- Basic analytics (e.g. Google Analytics) to track interest.

7. Technical Requirements

- Domain name registered and pointed to the host.
- Reliable hosting with SSL.
- Responsive across phone, tablet, and desktop.
- Form submissions routed to email and/or WhatsApp.
- A simple way for staff to update text and photos later (lightweight CMS), if desired.
- Standard backups.

8. Design Direction

Clean, calm, and credible — the visual feel should reassure someone in pain or recovering. Generous white space, soft health-oriented colours, clear typography, and warm,
